Sweetpotato Plants 2013

People who have never grown some of the Heirloom sweet potato varieties are missing out on some of the tastiest varieties. The reason these are not commercially available is that some varieties will produce more and commercial growers are able to get more bushels per acre. The standard variety is Beauregard. Below is a list of varieties we are supplying this year and while some are standard, others are novelty.

American (Yam) varieties usually have moist flesh; Asian varieties usually have dry flesh. Orange fleshed varieties usually are moist. Light yellow/white fleshed varieties usually are dry flesh.

Also note that true Yam (which is a completely different species of plant native to Africa) is not grown commercially in the US.

We can not offer large order discounts on the following varieties. If you need large numbers, please see our wholesale price list,

Section A

5-24 plants @ \$1.00 each

25-49 plants @ .89 cents each

50+ plants @ .69 cents each.

Prices subject to Change without notice

8633

Red/orange skin, deep orange flesh. vigorous growing, compact plants, great producer of large, fat, sweet

potatoes, very sweet orange flesh. An excellent variety.

Pox and nematode resistant. Leaves and vine tips are edible too, used much like spinach. Early type Slow and shy slip producer so don't expect early shipment.

Allgold (Oklahoma 1953) **VERY LIMITED for 2013**

Early. Vigorous vines, tan-yellow skin with pale orange flesh, heavy yields. Equal if not superior to Porto Rico in taste and table appearance and contains 50% more vitamin C and more than 3 times as much vitamin A. Developed by Dr. Corder, Oklahoma A & M College.

Beauregard

Orange skin, orange flesh. Thin stalks, vigorous grower, good producer, fat & heavy sweet potatoes. A typical "yam" type you find in stores. Has pox and nematode resistance. Early production.

Bunch Porto Rico

Mid-season. Regular leaf, yellow-orange skin and flesh. Needs long season to do well. Bush type, great for smaller gardens.

Carolina Nugget (North Carolina 1954)

Roots short, blocky with rosy skin. Flesh medium orange. Roots have good table quality. Leaves deeply cut, dark green with a purplish tinge. Increased yields and superior root shape in heavy soils. Needs less curing to store well than other cultivars. More resistance to fusarium wilt and southern root knot than Centennial

Carolina Ruby **sold out**

Favorable with Beauregard and was superior to Jewel. Yield similar to Beauregard for the U.S. #1 and canner grades and slightly higher for jumbo grades. Harvest dates typically 3-5 days earlier than Beauregard. Roots store well without excessive weight loss from storage rots or dehydration. Baked roots have uniform color, and moist smooth flesh, and good flavor.

Corder's Red (heirloom type 1950's)

This is a very compact bush type plant with red skin and orange moist flesh. Excellent for people with small gardens. The name "Corder's Red" was given by local growers as it was never officially released. From the breeding material of Dr. H. B. Corder of Oklahoma. Fair storage variety and great tasting. A personal Favorite. One of our top producers in 2010. Early type

Dianne/Garnet

This is also sold as Garnet. Red skin, Fat stalks, vigorous grower, sweet, dark orange flesh, torpedo shaped sweetpotatoes, good producer. Interesting ivy leaves make a good ornamental plant or ground cover too.

Georgia Jet

Root shape short spindle. Skin color purple-red. Flesh light orange. Earliness 90 days under good conditions. Storage satisfactory. Good or excellent baking tests. This variety is prone to cracking in dry conditions.

Hatteras (North Carolina)

An orange-fleshed, smooth-skinned, rose colored, table stock sweetpotato. The leaves are typically green and triangular shaped, and the vines produce a dense canopy that competes well against weeds. Hatteras normally produces uniform shaped roots high yields are normally harvested in 100-110 days.

Hernandez (Louisiana 1990)

Mid-season to late. Vigorous vines, orange skin, dark orange flesh. Very moist when cooked, above average yields. This was one of our best producers in 2010.

Jersey White

White skin and creamy white flesh. Light and delicate sweetpotato flavor. Very similar to Hammond White.

Jewel running way behind

Mid-season. Semi-bush, greenish colored normal leaves, above average yields, tends to produce medium sized roots regardless of the season length. Has light orange skin with light orange flesh, Sweet, Moist flesh.

Mahan / Bradshaw (heirloom)

Mahan was renamed Bradshaw in 2010, Heirloom variety High production and excellent storage. Very sweet, Moist, Orange Flesh. Ivy leaves with semi compact vines. Looks very similar to Continental Red. This may also be the same as Carolina Nugget.

Molokai Purple NEW for 2013

Early to mid season production. For us this year we had great production but the roots tend to be long and skinny. Deep Purple flesh. Very popular in Hawaii where it originated.

Purple Delight (formally Alabama Purple)

Purple fleshed with dark purple skin. Flavor is typical to the other purple fleshed varieties, which is not real sweet. Vining growth with early to mid-season production

Vardaman **SOLD OUT**

Compact Bush type habit. Root skin color very light but changes to rose or copper when exposed to light. Roots tend to be long and skinny. Flesh deep orange. Yield equal to Centennial or Jewel. Excellent storage life. Excellent Canning and baking characteristics

White Triumph

Mid-season. Vining, regular leaf, cream skin, white flesh, average yields.

We Ship Sweet Potato Slips/Plants

We cannot ship to you if you live in Alaska, Arkansas, Florida, Hawaii, Mississippi. If you live in these states, please do not order sweetpotato plants. We do not ship outside the continental US

Sweetpotato Slip Prices.

We are not set up for large orders this year. Our primary focus is to supply home gardeners and small market growers looking to trial unusual varieties in smaller quantities.

Please order a minimum of 5 plants per variety

Slips are sent bare root. Cuttings are usually sent in ziplock bags. Shipping is by priority mail.

Prices are the same for slips or cuttings

5-24 plants @ \$1.00 each

25-49 plants @ .89 cents each

50+ plants @ .69 cents each.

The above prices are for this section A only. Pages 1 and 2

Shipping and Handling \$8.50 per shipment

Minimum order is \$12.00 not including shipping

Our plant policy is to supply the best plants we can. However, we will not be liable for anything over the purchase price. If this is not acceptable, please find another source for your plants.

Shipping season begin after May 6, 2013 and continues until around June 30th or later depending on availability.

Please allow up to two weeks from the time we receive your order and shipping.

We take Check or US Postal Money Order for payment. We can take paypal for your convenience if you need to use a credit card. Please email your order and we will send a money request.

50 plants \$20.00 (3 to 4 varieties)
100 plants \$32.00 (5 or more varieties)

All varieties will be labeled

Un-rooted Cuttings. (URC)

An Un-rooted Cutting is essentially a slip that is cut above the root line. Sweetpotatoes are so easy to root, that it is possible just to plant out and keep moist for a few days to start rooting. The bottom two to three nodes can be placed in water for two or three days to begin the rooting process then planted out. Try to plant on a cloudy day or provide some shade for couple of days to help them get established. If they appear to die, give them time as the stem below the soil will usually produce more shoots.

**Not sure what to order and like surprises?
We offer the following assortments.
These will be OUR choice of varieties.**

Short Season Assortment our choice of varieties.
A mixture of some of the earliest maturing varieties we have

12 plants \$7.50 (2 varieties). 25 plants (3 or more varieties) \$12.50, 50 plants (3 or more varieties) \$24.00. 100 plants (3 or more varieties) \$45.00

WHOLESALE SLIPS

If you need large quantities please visit our wholesale page at <http://duckcreekfarms.com/pdfs/SweetWholesale13.pdf>

Maturity based on a minimum temperature of 68 F or above night time low and 80 F or above daytime high. If these temps are not maintained, it will take a bit longer

Early: 90 days

Mid Season: 110 days

Late: 130 days

Very late: 140 days or longer

Section B

All slips in Section B are \$1.00 each no matter how many you order

The following varieties are only listed on our online catalog and are not listed in our printed catalog. They are all VERY limited. Please try and limit the number you order of each. We will not limit the number you can order, but after we receive orders for 100 (plants) each we will suspend the availability until we know we will have sufficient numbers to re-list. So please check the availability before ordering. These are grown in very low numbers, mostly to preserve them and keep them going so we can not offer large number discounts.

Specialty Sweet Potato Varieties

Below are some of the older releases, heirlooms or hard to find varieties we have

in limited quantities. All the below varieties are \$1.00 each no matter how many you order with a \$5.00 minimum per variety. We do not limit the number of plants you can order on most varieties, however, if you plan to order more than 10, please email first to make sure we have enough. Most are very limited. You can also check our [Availability at http://duckcreekfarms.com/pdfs/SweetPotato_Availability.pdf](http://duckcreekfarms.com/pdfs/SweetPotato_Availability.pdf)

Arkansas Red (heirloom type)

Early. pink/red skin, orange flesh, good yields Prolific producer and one of our top producing varieties in 2012

Asian Greens Variety

We received this variety from an Asian grower that grew them for greens. Grown for the vines which are very good cooked liked spinach. Don't expect a root crop on these.

Barberman (heirloom)

Orange skin and flesh. Early to mid season with good production and good storage qualities. . One of our top producers for 2012

Carolina Bunch (South Carolina 1992)

Mid-season. Semi-bush, orange skin, light orange flesh, good yield

Carver (Alabama)

Skin color rose. Regular leaf. Flesh moist, deep orange Excellent storage. Good canning and baking qualities. Highly resistant to fusarium wilt. Intermediate resistance to southern root knot nematode. Suited for both fresh and processing market.

Charleston Scarlet (USDA 2006) **SOLD OUT**

Produces orange-fleshed, sweet roots with attractive scarlet-colored skin. Its high level of insect and nematode resistance may be very beneficial for organic farmers and home gardeners who typically do not use chemical pesticides. Good production. Mid season.

Chesapeake formerly MD-253

Orange skin and flesh. Early production with very excellent yields. High number of #1 roots with excellent storage qualities.

Cordner (Oklahoma/Texas 1983)

Bronze/Copper Skin and moist orange flesh. Excellent baking and canning quality. Good Yields.

Darby (Louisiana)

Characteristics similar to Beauregard but with potential for earlier and improved production in sandy soils.

Dingess Old Time White

Mid-season. Vining, regular leaf, large white skin and flesh potatoes. Good production

Dingess Pink Tint

Mid-season. Vining, regular leaf, white skin with pinkish flecks, white flesh, average production.

Dingess Purple Flesh new for 2013 **SOLD OUT**

Mid season. Vining regular leaf, Purple skin with purple flesh good yields

Dingess Rusty Coat

Mid-season. Semi-bush, regular leaf, with pinkish skin, and white flesh, average production

Dingess White With Pink Eye new for 2013

White skin and flesh. Very Productive. early

Excel (South Carolina 1989)

Early maturity. Vigorous vines, normal leaf, large, roots, light copper skin, pale orange flesh, Stores well. Excellent baking and canning qualities. Expect above average yields.

Genseng Orange

We accidentally left this variety out and just added it to our catalog on 4/15/13 It was one of our best producers in 2012. Early. Semi-bush, Ivy leaf leaf.

Georgia Red (Georgia 1955)

Georgia Red is a selection from a cross of Porto Rico. It has a reddish/orange skin and orange flesh with a soft/moist texture. Excellent keeping and eating quality. While we try and select the reddest color skinned roots for our seed stock, the color will vary from reddish to orangish-tan. Excels as a baking potato. It's a mid to late season variety and will need in about 110-120 days to mature. Expect Average Yields, though it was one of our biggest producers in 2011.

Golden Sweet **SOLD OUT**

Beige skin, light yellow flesh. Very vigorous, a quick growing and high producer of heavy-set typically shaped sweet potatoes. Great tasting white-type variety. Mid-season

Ivis White Cream (Heirloom Type)

Early production. cream skin, cream flesh, uniform roots, expect above average yields

Korean Purple (Heirloom of unknown origin) **SOLD OUT**

Early maturity. Vining habit, dark green leaves, purple skin, with very sweet, white flesh, excellent yields.

Maryland Supreme formally Maryland-810

Early production. red skin, deep orange flesh, above average yields. Very moist sweet flesh. Good Yields

Memphis Pride (heirloom)

vining, pinkish skin, light orange flesh, above average yields, midseason, very similar to Betty's

Nemagold (Oklahoma 1958) **SOLD OUT**

Mid-Season Production. Roots cured and stored for a short time are sweet, soft, and moist when baked. Flesh orange. Skin gold. Carotene high, similar to Allgold. Good Yields

New Jersey Red (Heirloom) new for 2013

Early production of uniform roots with red skin and orange flesh. Heavy producer. This was our top producer for 2012. Extremely good storage qualities

Norton (heirloom from NC)

Cream skin with white flesh, very productive. An heirloom that dates back to the 1800's

Okinawa Purple **Please limit your order to 25 or less**

Light beige skin, purple flesh. Flesh gets darker and deeper purple when cooked. They are surprisingly sweet when cooked. Pretty foliage plant as well. Slow grower. Needs a VERY long, hot growing season. Preferably 140 days or longer. Originally from Japan... They will form roots out away from the center of the plant... **Attention:** we only recommend these for trial, as they are not high production and need a **very long season** and not adapted to all of the US.

Redcliff (South Carolina 1968)

Mid-Season maturity. Roots blocky, red-skinned. Flesh deep, uniform, salmon. Baking quality good to excellent. Canning quality good. Moderately good disease resistance. Good Yields.

Redgold (Oklahoma 1953)

This was the second most popular variety grown in Oklahoma in the 50's and 60's and is a high yielding fresh market type developed by Oklahoma State University. It has reddish or copper-skin color and salmon-orange flesh color. Flesh is moist, canning quality poor, storage life good

Red Jewel (Georgia) **SOLD OUT**

Pinkish/Red skin color with orange flesh. Rated good for canning. Baking quality good to excellent. Good Storage. Early to Mid season maturity

Red Wine Velvet (Heirloom type)

Mid-season. Average vines, deep red skin, Very smooth, sweet, moist, orange flesh, and average yield. A very popular variety that usually sells out fast. Slow to sprout so don't expect early shipment.

Red Yam

Reddish skin and moist orange flesh. Expect early, above average yields. Semi-Bush habit.

Red Resisto

Similar to resisto only with red skin. Good production

Regal (South Carolina 1984) **SOLD OUT Until early June**

Red Skin with dark orange flesh which may be lighter in some environmental conditions. Excellent Baking flavor. Can produce high yields. Late Maturity

New for 2013

Ornamental Sweetpotato Plants

By Popular Request

These are shipped bare root with a root ball ready to plant out into your garden or containers. All varieties are \$1.00 each with a minimum of 5 per variety. Add the number Wanted to the specialty sweetpotato *Order Form* under section B

Blackie **SOLD OUT**

Black ivy leaves with a spreading growth habit

Compact Margie

Compact growing with chartreuse colored leaves

Margarita **SOLD OUT**

Very vigorous spreading habit with chartreuse colored leaves

Tri-Color

Beautiful plant with green, white and pink leaves

ORDER FORM

<http://www.duckcreekfarms.com/pdfs/OrderForm2013.pdf>

Resisto (South Carolina 1983)

Skin reddish copper. Flesh dark orange. Yields equivalent to Jewel. Baking & canning qualities similar to Jewel. Average yields

Scarlet (North Carolina 1982)

Roots tend to be more cylindrical and slightly longer than Jewel roots. Skin red. Flesh orange. Roots remain sound in storage for 7 or more months. Judged superior to Jewel in baking trials.

Sweet Red (North Carolina 1987)

Early. Very vigorous vines, regular leaf, deep copper-red skin, deep orange flesh, roots short and chunky ..good yields.

Tainung 65 (Taiwan)

Early-mid season. Dark pink skin and pale yellow flesh, good production.

Topaz (Texas 1987)

Flesh medium orange. Skin smooth, bronze, good production, early to mid season maturity

Violetta (Heirloom of unknown origin) **SOLD OUT**

Purple/Red skin with sweet white flesh. Early Maturity. Expect above average yields.

Wakenda (heirloom)

Early. Vining, pinkish skin, dark orange flesh, good yields

Wilma's (heirloom)

Orange skin, pale orange flesh, good producer with early-mid maturity,

Viola **SOLD OUT**

Mid-season. Vining with regular shaped leaf, pinkish purple skin and orange flesh, good yields

Please keep in mind that our experience may not duplicate yours. We had a crop failure in 2011 on Camote Morado, however, Glenn Drowns of Sand Hill Preserve reported excellent yields. We had a similar crop failure on Heartogold due to our weather, but our grower Friend Jack Osman from Pennsylvania reported a bumper crop. So Sweetpotatoes can and will perform differently from year to year and in different parts of the county depending on the weather.
